Half Term 5 (6 weeks) - Year 10				
Week / Date	Homework task 1 Cornell Notes	Homework task 2 Exam Question		
Week 1 15th April 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		
Week 2 22nd April 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		
Week 3 29th April 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		
Week 4 6th May 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		
Week 5 13th May 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		
Week 6 20th May 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		

Half Term 6 (7 weeks) - Year 10				
Week / Date	Homework task 1 Cornell Notes	Homework task 2 Exam Question		
Week 7 3rd June 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		
Week 8 10th June 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		
Week 9 17th June 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		
Week 10 24th June 2024	Mock Exams - Use your blue retrieval sheet to complete retrieval quizzing	Mock Exams - Complete the exam question. Use the printed revision resources (past papers) to prepare for your mock		
Week 11 1st July 2024	Mock Exams - Use your blue retrieval sheet to complete retrieval quizzing	Mock Exams - Complete the exam question. Use the printed revision resources (past papers) to prepare for your mock		
Week 12 8th July 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		
Week 13 15th July 2024	Complete 1 page of retrieval quizzing RAG rate the questions Answer the questions on Sparx Science	Complete the exam question. Fill the remainder of the page with retrieval quizzing on your Red and Amber questions Answer the questions on Sparx Science		

WEEK 1 Questions (cover and quiz) - Atmosphere

	, , ,
Question	Answer
What element forms most of Earth's atmosphere today?	Nitrogen
Which element that makes up about 21% of the	
atmosphere of Earth today was not thought to be	
present in the atmosphere 4.5 billion years ago?	Oxygen
As the Earth evolved, chemical reactions with what	
element are thought to have slowed the release of	
oxygen to the atmosphere?	Iron
What gas given out by volcanoes is thought to have	
condensed to form oceans?	Water vapour
What factor has caused changes in Earth's atmosphere	
but is not found on Venus or Mars?	Life
What is the chemical test for oxygen?	Relights a glowing splint
Why did the formation of the Earth's early oceans cause	3 3 3 1
a decrease in atmospheric carbon dioxide	
concentrations?	The carbon dioxide dissolved in the water
What do some sea creatures use dissolved carbon	
dioxide to help them do?	Form shells
What sort of chemical compound are shells made from:	
an oxide, a carbonate or a chloride?	Carbonate
What is the formula for calcium carbonate?	CaCO ₃
What process in plants and algae causes a reduction of	
atmospheric carbon dioxide concentrations?	Photosynthesis
Photosynthesis affects the concentrations of two gases	·
in the atmosphere – carbon dioxide, and what other	
gas?	Oxygen
Give the name of some of the earliest photosynthetic	
microorganisms.	Cyanobacteria/algae
Certain gases in the atmosphere keep the Earth warm.	Oyanobacteria/aigae
What is this effect called?	Greenhouse effect
Name three greenhouse gases.	Methane, carbon dioxide, water vapour,
Energy is transferred from the Sun by what?	(infrared/ electromagnetic) radiation/ waves/ light
Energy is transferred from the Sun by what? The warm Earth emits what type of (electromagnetic)	(Illinated/ electromagnetic) radiation/ waves/ light
waves?	Long wavelength Infrared
In an atmosphere containing greenhouse gases, what	Long wavelength filliated
happens to some of the infrared waves that the Earth	
emits?	Absorbed (and re-emitted in all directions)
Why do modern thermometers give better quality	Thermometers are now more accurate/ have a better
evidence than those from the 18th century?	resolution
What word (beginning with c) describes the way in	1.000.0001
which two variables appear to be linked because they	
show similar patterns of change?	Correlation
What term is used to describe the changes to average	Considuon
weather conditions around the world?	Climate change
Evidence for carbon dioxide variations over the last 800	
000 years comes from Antarctica. In what form is this	
evidence?	Ice cores
What type of human activity has mainly increased the	
level of greenhouse gases since 1750?	Burning fossil fuels
The acidity of the oceans is increasing due to more	
carbon dioxide dissolving in the water. What is this	
doing to the pH of the oceans?	Decreasing it/making it more acidic

Date: 15th April 2024 Week 1 Task 2 - Complete the exam question then fill the remainder of the page with retrieval quizzing. Use full sentences for the exam question, but not the quiz. Atmospheric pollution is emitted by cars. Some car emissions contain nitrogen dioxide. Describe how nitrogen dioxide (NO₂) is produced in the engine of a car that burns fossil fuels. (6)

Improvement Work: Atmospheric pollution is emitted by cars. Some car emissions contain nitrogen dioxide. Describe how nitrogen dioxide (NO ₂) is produced in the engine of a car that burns fossil fuels. (6)

WEEK 2 Questions (cover and quiz) - Forces

Question	Answer
What piece of equipment can be used to measure an	
object's weight?	A calibrated spring-balance or newtonmeter.
What is the name given to the single force that is	
equivalent to all other forces acting on a given object?	The resultant force
	The force causes an object to be displaced through a
What does it mean if a force is said to do 'work'?	distance.
What distance must be used when calculating work	It must be the distance that is moved along the line of
done?	action of the force.
What occurs when work is done against frictional forces?	Thermal energy dissipated to the surroundings (energy wasted).
What is the relationship between the force applied and	Extension is directly proportional to the force applied,
the extension of an elastic object?	provided that the limit of proportionality is not exceeded.
·	Deformation which results in the object being
What is meant by inelastic deformation?	permanently stretched.
What is the equation linking extension, force & spring	
constant?	Force = spring constant x extension
What are the units of force?	Newtons (N)
What are the units of extension?	metres (m)
What are the units of spring constant?	Newtons / metre (N/m)
What type of energy is stored in a spring when it is	Newtons / mode (14/11)
stretched?	Elastic potential energy
	Compression (this also causes elastic potential energy
What is the opposite action to extending a spring?	to be stored)
	,
What is meant by the term fluid? Triple: In any fluid, at what angle do the forces due to	A liquid or a gas
pressure act on a given surface?	At right angles (normal) to the surface
Triple: State the equation relating pressure, force and	The right diffice (normal) to the buriage
area.	Pressure = Force/ Area
Triple: What are the units of area?	metres squared (m²)
Triple: What are the units of pressure?	Pascals (Pa)
Triple: Write down 1 Pascal in terms of Newtons and	
metres squared.	1 Pa = 1N/m ²
	A thin (relative to the magnitude of the Earth) layer of
Triple: What is the Earth's atmosphere?	gas surrounding the Earth.
Triple: What happens to the density of the atmosphere	The atmosphere becomes less dense as altitude
with increasing altitude?	increases.
	As height increases, density of air molecules decreases. As density of air molecules decreases, frequency of collisions between air molecules and an object
	decreases.
Triple: \\/\by does atmospheric processes decreased	As frequency of collisions decreases, force on the object
Triple: Why does atmospheric pressure decrease with	decreases.
an increase in height?	As force decreases, pressure decreases.
Triple: What is upthrust always equal to?	The weight of the fluid that the object displaces.
Triple: What factors influence whether an object will	Hathruot Weight Density of fluid
sink or float?	Upthrust, Weight, Density of fluid
What is acceleration?	The rate of change of velocity.
What does an inclined gradient of a velocity time graph	lk in analouskiu u
tell us about the motion of an object?	It is accelerating
What does a flat line on a velocity time graph tell us	Constant valority
about the motion of an object?	Constant velocity

What does the inclined gradient of a distance time graph	
tell us about the motion of an object?	The speed of an object.
What does a flat line on a distance time graph tell us	
about the motion of an object?	The object is at rest/stationary
What does a diagonal line of constant gradient on a	
distance time graph tell us about the motion of an	
object?	The object is moving at constant speed
	Object starts moving with rapid acceleration.
A velocity time graph starts with a steep gradient. The	Acceleration then decreases until it reaches zero.
gradient gradually decreases until the line becomes flat.	From that point, the object is moving at constant speed
Describe the motion of the object in these stages.	(terminal velocity).
A distance time graph starts with a steep gradient. The	Object initially moving at high speed.
gradient gradually decreases until the line becomes flat.	Speed then decreases until it reaches zero.
Describe the motion of the object in these stages.	From that point, the object is stationary.
Which two factors does the stopping distance of a car	
depend on?	Thinking distance and braking distance
What is the relationship between thinking distance,	
reaction time and speed?	thinking distance = speed x reaction time
How would thinking distance change if the speed of the	
car doubles?	Thinking distance will double
How would the braking distance change if the speed of	
the car doubles?	Braking distance would increase (by a factor of 4).
What is the term used to describe the time taken for the	
driver to see the hazard and press the brake pedal?	Reaction time
What factors can increase the thinking distance of a	
car?	Using a mobile phone, speed, intoxications, distractions
	poor road conditions, poor driving weather, poor tyre
What factors can increase the braking distance of a car?	condition, poor condition of the brakes, speed
What is the distance moved by a car during the reaction	
time called?	thinking distance

ate: 22nd April 2024 /eek 2 Task 1 - 1 Page of retrieval quizzing - do not use full sentences						
, , , , , ,		, , , , , , , ,		, , , , , , , , , , , , , , , , , , , ,	, , , ,	 . , , ,
. , , , ,		, , , , , , , ,		, , , , , , , , , , , , , , , , , , , ,	, , , ,	 . , , ,
 						

Date: 22nd April 2024

Week 2 Task 2 - Complete the exam question then fill the remainder of the page with retrieval quizzing. Use full sentences for the exam question, but not the quiz.

Force B	The man increases Force A. Explain what happens to Force B and to the movement of the man. (4)
Improvement Work: The man increate to the movement of the man. (4)	ases Force A. Explain what happens to Force B and

WEEK 3 Questions (cover and quiz) - Cell Biology

Question	Answer
	Increase the concentration gradient, decrease the diffusion distance/thickness of surface, increase the
How can we increase the rate of diffusion?	surface area
How is a root hair cell adapted for osmosis?	Lots of hairs/projections that increase the surface area so more water can be absorbed.
	Many mitochondria release energy for active transport.
How are cells in the small intestine adapted for active transport?	Villi to increase surface area. Good blood supply to maintain concentration gradient.
	Large surface area on gills, constant concentration gradient between blood and water, thin diffusion
How are fish gills adapted for efficient exchange?	pathway
What is required for active transport?	Energy from respiration
What is a concentration gradient?	The difference between two concentrations
Define the terms solute and solvent	Solute- Soluble solid/substances that dissolves Solvent- A liquid that the dissolves the solute
What are the differences between hypertonic, hypotonic and isotonic?	Hypertonic- less solute inside the cell, more outside Hypotonic- more solute inside, less outside Isotonic- same amount of solute inside/outside cell
How are single-celled organisms adapted to efficient transport of molecules?	Have a large surface area to volume ratio. This allows sufficient, quick transport of molecules into and out of the cell.
What is a stem cell?	An undifferentiated cell that has the potential to specialise
Name another type of stem cell found in animals	Embryonic stem cells
Where are embryonic stem cells found?	Embryos, umbilical cord
Where are adult stem cells found?	Bone marrow
What is a plant stem cell called?	Meristems
Where would you find plant stem cells?	Meristem (tip of plant)
How are plant stem cells different from adult stem cells	They can differentiate at any time, throughout the life of
or embryonic stem cells?	the plant
	Can be used to produce clones of plants quickly and economically. Rare species can be cloned and
	prevented from extinction. Crop plants with special (e.e.
	disease resistance) can be cloned to produce lots of
What is an advantage of using plant stem cells?	identical plants for farmers
What are the advantages of using adult stem cells?	Easier to obtain, effective, no ethical issues, abundant supply, little or no problems with immune rejection
What are the advantages of using embryonic stem	Can differentiate into any type of cell. Potential to cure
cells?	diseases such as blindness, diabetes and cancers
	Ethical reasons surrounding the use of embryos, may not know the side effect, infection, expensive, potential
Why might people be against the use of stem cells?	rejection

eek 3 Task 1 - 1 Page of retrieval quizzing - do not use full sentences

Date: 29th April 2024 Week 3 Task 2 - Complete the exam question then fill the remainder of the page with retrieval quizzing. Use full sentences for the exam question, but not the quiz.	Figure 1
Explain how villi are adapted for efficient absorption of sugar molecules. (4)	Mitochondria
Improvement Work: Explain how villi are adapted for efficient a	absorption of sugar molecules. (4

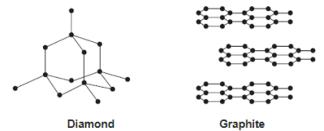

WEEK 4 Questions (cover and quiz) - Bonding

Question	Answer
What kinds of elements usually form molecules?	Non-metals
What kinds of bonds are found in molecules?	Covalent
How strong are the forces of attraction within simple covalent molecules?	They are year attempt
	They are very strong.
How strong are the forces of attraction between simple covalent molecules?	They are relatively week
	They are relatively weak.
Are simple molecules usually good conductors of	No thou are poor conductors of electricity
electricity at room temperature? What is the name for lots of monomers joined together	No, they are poor conductors of electricity.
to form large molecular chains?	Polymers
What simple molecule joins to form poly(ethene)?	Ethene
Why might simple molecules, such as methane, have	Because they have weak intermolecular forces of
low melting points?	attraction between them
What are monomers?	Small molecules that can be joined to make polymers
What is poly(ethene) made of?	Hydrogen and carbon or ethene monomers
What are polymers?	Many monomers joined together
In what types of bonds are pairs of electrons shared?	Covalent bonds
What is the monomer unit in poly(propene)?	Propene
Which has the higher melting point: poly(ethene) or the	
monomer it is made from?	Poly(ethene)
What are intermolecular forces?	Forces of attraction between molecules
Do simple molecules have strong intermolecular forces	
between them?	No. They are described as weak.
Why are simple molecules poor conductors of	·
electricity?	There are no charge carriers.
What type of bonding is between the atoms in a	
molecule of water?	Covalent
What type of structure does water have?	Simple covalent molecule
What strength of forces are there between different	
molecules of water?	Weak
Does pure water conduct electricity?	No
	High melting point, shiny when polished, malleable, high
What is a typical property of a metal?	density, conducts electricity
What does the term malleable mean?	Can be hammered or bent into a different shape
What type of bonding involves sharing electrons?	Covalent
What kind of bonding and structure tends to be	Covalent
associated with low melting points and boiling points?	Covalent, simple molecular
Which kind of bonding and structure allows substances	Oovalent, simple molecular
to conduct electricity when solid?	Metallic
Why does sodium chloride conduct electricity when	lons are free to move when molten and the charged
molten but not when solid?	ions can carry the current.
Name a substance that has a very high melting point	is in sair y and sair sin
and is a non-conductor of electricity in any state.	Diamond
Why do lattice structures have high melting points?	Lots of energy is needed to break many strong bonds.
viny do latito stratities have high metting points?	It contains freely moving delocalised electrons, and the
Why does sodium metal conduct electricity?	charged electrons can carry the current.
, 2000 coalain motal conduct clockforty:	From: molecular formula; structural formula; dot and
	cross diagram; all shells; dot and cross diagram outer
	shell only; 3D ball and stick; 2D space-filling; or 3D
Name two types of bonding model.	space-filling (other answers are possible)
Name a type of bonding model that is used to show	
what happens to the electrons in a covalent bond.	A dot and cross model

Use the diagrams above and your knowledge of structure and bonding to explain why graphite is very soft and diamond is very hard. (4)
Improvement Work: Use the diagrams above and your knowledge of structure and bonding to explain why graphite is very soft and diamond is very hard. (4)

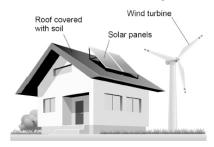

WEEK 5 Questions (cover and quiz) - Energy

<u> </u>	
Question	Answer
What is the store of energy that is associated with	
temperature changes?	Thermal energy
-	change in thermal energy = mass x specific heat
What is the word equation for thermal energy?	capacity x temperature change
What is the symbol equation for thermal energy?	$\Delta E = m c \Delta T$
What is the unit of specific heat capacity?	J/kg °C
What is the specific heat capacity of a substance?	It is the amount of energy required to raise the temperature of 1 kg of the substance by 1 °C.
What is the definition of power?	Power is defined as the rate at which energy is transferred or the rate at which work is done.
What is the word equation for power?	power = energy transferred ÷ time, power = work done ÷ time
What is the symbol equation for power?	P = E/t P = W/t
What is the unit of power?	Watts, W
What does 1 Watt mean in terms of Joules and seconds?	1 Joule of energy is transferred every second.
What is the most common way that energy is "wasted"?	Thermal energy / heating the surroundings
Give some examples of how to reduce unwanted energy	
transfers.	Thermal insulation, lubrication.
What does thermal conductivity mean?	The higher the thermal conductivity of a material the higher the rate of energy transfer by conduction across the material.
What factors affect the rate of cooling of a building?	The thickness and thermal conductivity of its walls.
What does the efficiency of an energy transfer tell us?	How much of the total input energy is transferred usefully
	efficiency = useful output energy transfer ÷ total input energy transfer x 100% OR efficiency = useful power output ÷ total power input
What is the word equation for efficiency?	x 100%
What is the definition of a renewable energy resource?	It is one that can be replaced as quickly as it is used.
What are some examples of renewable energy resources?	Biofuel, wind, hydro-electricity, geothermal, tidal, solar, wave
What is the definition of non-renewable energy?	It is one that cannot be replaced as it takes too long.
What are some examples of non-renewable energy resources?	Fossil fuels (coal, oil, natural gas), nuclear
What are some examples of uses of energy resources?	Transport, electricity generation, heating.
What does the word reliable mean?	Always available when you need it.
Why are some energy sources more reliable than others?	Some resources rely on the weather (solar/wind power) which may not always be favourable.
	Burning fossil fuels and biofuel release CO2 into the
What environmental impact do some resources cause?	atmosphere which contributes to global warming.
Although we know that these environmental issues arise, why can we not always deal with them?	There may be political, social, ethical or economic considerations.

Explain why it is a good idea for the eco-house to have both a wind turbine and solar panels. (2)
Improvement Work: Explain why it is a good idea for the eco-house to have both a wind turbine and solar panels. (2)
,

WEEK 6 Questions (cover and quiz) - Inheritance

Question	Answer
What are the two methods of reproducing?	Asexual reproduction and sexual reproduction.
How many parents are involved in asexual reproduction?	One.
Which type of reproduction produces genetically	One.
identical offspring?	Asexual reproduction.
Which type of cell division is involved in asexual reproduction?	Mitosis.
Which type of cell division produces gametes (sex cells)?	Meiosis.
Which type of reproduction involves gametes?	Sexual reproduction.
Which type of cell division produces genetically identical cells?	Mitosis.
Which type of cell division produces genetically different	Wilder St.
cells?	Meiosis.
What are the names of the male gametes in flowering plants and animals?	Pollen (plants), sperm (animals).
What are the names of the female gametes in flowering	
plants and animals?	Eggs.
How many sets of chromosomes are found in body cells?	Two sets of chromosomes.
How many sets of chromosomes are found in gametes?	One set of chromosomes.
Which type of cell division divides twice to form four cells?	Meiosis.
Which type of cell division divides once to form two cells?	Mitosis.
What type of cell division occurs as an embryo develops?	Mitosis.
What happens to the number of chromosomes when the gametes fuse?	The number of chromosomes is restored to the normal number (one set from the female gamete and one set from the male gamete).
What is a genome?	The entire genetic material of an organism.
What was the human genome project?	A study to identify the sequence of all the genes in a human.
Why was the human genome project important?	It helps us to search for genes linked to different types of diseases, understand and treat inherited disorders, and trace human migration patterns from the past.
The state of the s	gana dada naman mganan padama namana pada
What shape is a DNA molecule?	A double helix.
What is a gene?	A small section of DNA that codes for a sequence of amino acids to make a protein.
What is a chromosome?	A structure inside the nucleus of a cell that is made up of DNA.
What are chromosomes made of?	DNA (deoxyribonucleic acid).

Scientists working on the 'Human Genome Project' have now mapped the entire genetic code of humans. Explain one way this could be important for people in the future. (2)

WEEK 7 Questions - Atoms and The Periodic Table

Question	Answer			
Define the term inert.	Unreactive			
	They have full outer shells, so do not need to gain or lose electrons			
Explain why the noble gases are inert. What is a trend?				
State the trend in the melting points of the alkali metals.	A pattern in properties			
· · · · · · · · · · · · · · · · · · ·	Melting point reduces further down the group			
Write a name for this chemical equation LiOH	Lithium hydroxide			
Write a name for this chemical equation KOH	Potassium hydroxide A reaction in which a more reactive element takes the			
Define a displacement reaction?	place of a less reactive element in a compound			
Explain why fluorine is more reactive than chlorine.	Fewer shells/electrons, less shielding (or stronger attraction from nucleus), easier to gain electrons			
Explain why potassium is more reactive than lithium.	More shells/electrons, less shielding (or weaker attraction from nucleus), easier to lose electrons			
Explain why bromine is less reactive than chlorine.	More shells/electrons, more shielding (or weaker attraction from nucleus), harder to gain electrons Fewer shells/electrons, less shielding (or stronger			
Explain why sodium is less reactive than caesium	attraction from nucleus), harder to lose electrons			
What did Chadwick discover?	The neutron			
What elements are in sodium fluoride?	Sodium and fluorine			
What elements are in potassium nitrate?	Potassium nitrogen and oxygen			
Write down the charge of a lithium ion.	+1			
Write down the charge of a chlorine ion.	-1			
What are two isotopes of the same element?	Atoms of the same element with different numbers of neutrons			
The number of and				
are the same in atoms of different isotopes.	Protons and electrons			
Who in 1914 revised the model of the atom suggesting electrons are in certain energy levels	Bohr			
Who discovered the electron?	Thomson			
Who suggested atoms behaved as if they were tiny,				
hard spheres?	Dalton			
Describe the structure of the transition metals.	Lattice of positive ions surrounded by delocalised electrons.			
State the properties of the transition metals.	Hard, shiny, conduct heat and electricity, ductile			
What is an alloy?	A metal mixed with other metals or elements			
Why are alloys often used?	Atoms of other elements change the structure of metals, giving them more useful properties (e.g. harder, stronger).			

Date: 3rd June 2024 Week 7 Task 1 - 1 Page of retrieval quizzing - do not use full sentences	
	-

Date: 3rd June 2024 Week 7 Task 2 - Complete the exam question then fill the remainder of the page with retrieval quizzing. Use full sentences for the exam question, but not the quiz. Explain why caesium is more reactive than sodium. You should answer in terms of electrons. (4) Improvement Work: Explain why caesium is more reactive than sodium. You should answer in terms of electrons. (4)

WEEK 8 Cover and quiz Use your blue mock sheet for your retrieval practice this week.

Date: 10th June 2024
Week 8 Task 1 - 1 Page of retrieval quizzing - do not use full sentences

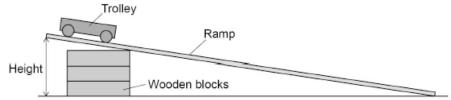

Date: 10th June 2024 Week 8 Task 2 - Complete the exam question then fill the remainder of the page with retrieval quizzing. Use full sentences for the exam question, but not the quiz. A stimulus from the hot pan will cause the muscle in the arm to contract and move the finger away. Describe how the stimulus from the hot pan reaches the muscle in the arm. (4) Improvement Work: Describe how the stimulus from the hot pan reaches the muscle in the arm. (4)

WEEK 9 Cover and quiz Use your blue mock sheet for your retrieval practice this week.

Date: 17th June 2024
Week 9 Task 1 - 1 Page of retrieval quizzing - do not use full sentences

Date: 17th June 2024

Week 9 Task 2 - Complete the exam question then fill the remainder of the page with retrieval quizzing on your Red and Amber questions on your blue sheet.

A student investigated how the height of a ramp affects the acceleration of a trolley down the ramp. Plan an investigation to determine how the height of the ramp affects the acceleration of the trolley. (6)
Improvement Work: A student investigated how the height of a ramp affects the acceleration of a trolley down the ramp. Plan an investigation to determine how the height of the ramp affects the acceleration of the trolley. (6)

WEEK 10 Cover and quiz Use your blue mock sheet for your retrieval practice this week.

Date: 24th June 2024
Week 10 Task 1 - 1 Page of retrieval quizzing - do not use full sentences

Date: 24th June 2024 Week 10 Task 2 - Complete the exam question then fill the remainder of the page with retrieval quizzing on your Red and Amber questions on your blue sheet. Explain how the hormones insulin and glucagon keep the blood glucose concentration at the correct level in a healthy human body. (5) Improvement Work: Explain how the hormones insulin and glucagon keep the blood glucose

concentration at the correct level in a healthy human body. (5)

WEEK 11 Questions (cover and quiz) - Inheritance

,	. ,
Question	Answer
What are different forms of the same genes called?	Alleles.
Which type of allele is expressed in the phenotype even if only one version of it is present?	Dominant
Which type of allele needs two versions to be present	
for it to be expressed in the phenotype?	Recessive
What keyword describes an individual with two identical alleles for a characteristic?	Homozygous
What keyword describes an individual with two different alleles for a characteristic?	Heterozygous
Define the keyword genotype.	All the alleles present in an individual.
What is the phenotype of an individual?	The physical appearance of an individual.
How many pairs of chromosomes are found in normal human body cells?	23
What are the sex chromosomes for male and female	
mammals?	XX- female, XY - male.
Give an example of a disease caused by a dominant allele?	Polydactyly (having extra fingers and/or toes).
Give an example of a disease caused by a recessive	
allele?	Cystic fibrosis.
What does it mean if someone is a carrier for a genetic	They are able to pass the recessive gene to their
disorder?	offspring but do not suffer the disease themselves.
	A person who is heterozygous for a genetic disease
Why are there no carriers for genetic disorders caused	caused by a dominant allele will suffer the disease
by dominant alleles?	themselves and so will be a sufferer not a carrier.
What is ambric coroning?	Testing to see if an embryo (or foetus) carries any
What is embryo screening? What keyword describes 'the differences in	alleles that cause genetic disorders.
characteristics in a population'?	Variation.
characteriotics in a population :	Variation is caused by genes, the environment and a
What causes variation?	combination of both genes and the environment.
	All species of living things have evolved from simple life
What is the theory of evolution?	forms that developed over 3 billion years ago. Mutations.
What causes genetic variation?	initiations.
What is a mutation?	A change in the DNA code.
	No, most mutations have no effect on the phenotype, some influence phenotype, very few determine
Is it common for mutation to lead to a new phenotype?	phenotype.
is a sommer for matation to lead to a new phonotype:	Individuals within a population have a range of
	phenotypes and genetic variation, individuals with
	characteristics most suited to the environment are more
	likely to survive and breed successfully, the alleles that
	enable the individual to survive are then passed on to
Describe the theory of evolution by natural selection.	the next generation.
	Fossils are the remains of organisms from millions of
	years ago that can be found in rocks, ice and other
What is a fossil?	places.
	They can be formed by the absence of decay (fossils in
	ice), the replacement of parts by minerals as they decay
	(fossils in rocks) or preserved traces of organisms
How are fossils formed?	(fossilised footprints).
Why is the fossil record incomplete?	Many early forms of life were soft-bodied, which means

	that they have left few traces behind. What traces there		
	were have been mainly destroyed by geological activity.		
Why are scientists uncertain about how life on Earth	There is a lack of evidence because there are gaps in		
began?	the fossil record.		
	How much or how little different organisms have		
What information do scientists get from fossils?	changed as life developed on Earth.		
What are the main causes of extinction?	A change in the environment the organism is living in.		
	There are no remaining individuals of a species still		
What does the keyword extinction mean?	alive.		
	Change in temperature, new predators, new diseases,		
	better competitors, long term geological changes to the		
	environment, single catastrophic events (e.g. volcanic		
What changes in the environment can cause extinction?	activity).

Date: 1st July 2024

Week 11 Task 2 - Complete the exam question then fill the remainder of the page with retrieval quizzing. Use full sentences for the exam question, but not the quiz.

Moose have distinct characteristics such as antlers. Describe how moose may have evolved to have large antlers. (5)
Improvement Work: Moose have distinct characteristics such as antlers. Describe how moose may have evolved to have large antlers. (5)

WEEK 12 Questions (Cover and quiz) - Chemical Changes

Question	
	Answer
What term describes a substance that attacks metals,	
stonework and skin?	Corrosive
What type of substance turns litmus paper red?	Acid
What happens in all chemical reactions?	New substances are formed.
What kind of reaction occurs between an acid and an	
alkali?	Neutralisation
What do you call a solution which is neither acidic nor	
alkaline?	Neutral
Give the name and formula of a common laboratory	Hydrochloric acid (HCI), nitric acid (HNO ₃), sulfuric acid
acid.	(H ₂ SO ₄), etc
Which ion is in excess in all acid solutions?	Hydrogen ions or H+ ions
Which ion is in excess in all alkali solutions?	Hydroxide ions or OH– ions
What scale is used for measuring acidic and alkaline	
properties?	The pH scale
Name three examples of acid/alkali indicators apart from	
universal indicators.	Litmus, methyl orange and phenolphthalein
What pH values are acidic?	Below 7
What happens to the pH as the H+ ion concentration	
increases?	It decreases
If a solution has the same concentration of hydrogen	
ions as hydroxide ions, how is it described?	Neutral or pH = 7
What word describes a solution that contains a large	
amount of solute in a small volume of solvent?	Concentrated
III.	December 15 and
How can a solution be made more dilute?	By adding solvent/water
What kind of reaction occurs between an acid and a	No. 40 Process
base?	Neutralisation
What is formed when an acid reacts with a base like a	0.15
metal oxide?	Salt + water
What acid would be used to make zinc sulfate from zinc	
oxide?	Sulfuric acid
What process can be used to separate an insoluble	
solid from a liquid?	Filtration
How can a sample of a dissolved salt be obtained from	
a salt solution?	Evaporation of the water

Date: 8th July 2024 Week 12 Task 1 - 1 Page of retrieval quizzing - do not use full sentences		

Date: 8th July 2024

Week 12 Task 2 - Complete the exam question then fill the remainder of the page with retrieval quizzing. Use full sentences for the exam question, but not the quiz.

A student plans a method to prepare pure crystals of copper sulfate.

The student's method is:

- 1. Add one spatula of calcium carbonate to dilute hydrochloric acid in a beaker.
- 2. When the fizzing stops, heat the solution with a Bunsen burner until all the liquid is gone.

The method contains several errors and does not produce copper sulfate crystals. Explain the improvements the student should make to the method so that pure crystals of copper sulfate are produced. (6)
Improvement Work: Explain the improvements the student should make to the method so that pure crystals of copper sulphate are produced. (6)

WEEK 13 Questions - Working Scientifically

	,
Question	Answer
	The smallest measurement that can be made with a
What is the definition of resolution?	measuring device.
140	Difference between the largest value and the smallest
What is the definition of range?	value.
What is the resolution of an ordinary 15 or 30 cm ruler?	1mm
	Difference between measurement and actual value that
What is the definition of a systematic error?	is the same each time.
	An error caused by the reading not being zero when no
What is a zero error?	measurement is being made.
	Repeated measurements are close together (small
What is the definition of precise?	random errors)
Why does doing repeats and taking a mean improve the	De la contraction of the formation of the contraction of the contracti
accuracy of a measurement?	Reduces the effect of random error
What is the definition of reliable?	Anyone could get the same experimental result again
	If same person did same experiment again, they would
What is the definition of repeatable?	get the same results
Which of the following gives the best definition of	If someone else did the same experiment, they would
reproducible?	get same results
	Hasn't kept control variables constant; confused
Why might a scientist's conclusion not be valid?	correlation with causation; other factors involved.
What is the definition of accurate?	How close the measurement is to the actual value.
	The smallest measurement that can be made with a
What is the definition of resolution?	measuring device.
Which number is represented by the prefix centi?	0.01
Which number is represented by the prefix kilo?	1,000
Which number is represented by the prefix Giga?	1,000,000,000
in the production of the produ	1,,000,000,000
What prefix do we use to represent (1/1000 or 0.001)?	milli
What prefix do we use to represent (1/1,000,000,000 or	
0.00000001)?	nano
 What does the gradient tell us about a graph?	How steep the line is
What is the gradient of a horizontal section of a graph?	Zero
<u> </u>	Find the point at which the line crosses the vertical (y)
How do we find the y intercept of a graph?	axis.
What is the rule for calculating the area of a trapezium?	½ (a+b) x h
What does the graph of a directly proportional	
relationship look like?	Straight line through the origin
What does the graph of an inversely proportional	
relationship look like?	Downwards sloping curve, never touches either axis

Date: 15th July 2024 Week 13 Task 1 - 1 Page of retrieval quizzing - do not use full sentences		

Date: 15th July 2024

Week 13 Task 2 - Complete the exam question then fill the remainder of the page with retrieval quizzing. Use full sentences for the exam question, but not the quiz.

Figure 1 shows the balance before anything was added. What type of error is shown on the balance and how could the student get a correct value for the mass of the cube from the balance? (2)
Improvement Work: What type of error is shown on the balance and how could the student get a correct value for the mass of the cube from the balance? (2)
