# Knowledge Organiser

<b>Component 3 Health and Wellbeing</b>	
Learning Aim A: Factors that affect health and wellbeing	
<u>Definition of health and wellbeing</u> a) Positive definition b) Negative definition c) Holistic definition d) Life Stages and our needs (Maslow's Hierarchy of needs pyramid)	<u>Social Factors: Relationships and Social Inclusion/Exclusion</u> a) Relationships (eg supportive and unsupportive) b) Social Inclusion (eg integration to the community) c) Social Exclusion (eg isolation and reasons for becoming isolated like homeless, physical/mental illness)
<u>Social Factors: Bullying and Discrimination</u> a) Bullying (types and their effects eg physical, Verbal, Cyber, Emotional, Sexual) b) Discrimination (eg Age, Disability, Gender, Race, Religion, Sexual Orientation) c) Promoting anti-discriminatory behaviour in the workplace (Equalities Act)	<u>Cultural Factors: Religion and Community Participation</u> a) Religion (positive and negative effects of being part of a religious group) b) Community Participation
<u>Cultural Factors: Gender Roles and Expectations, Gender Identity and Sexual Orientation</u> a) Gender Roles and Expectations (what is expected of men and women and how this influences our lifestyle) b) Gender Identity (how a person identifies and how this impacts on emotional and mental health) c) Sexual Orientation (describes the emotional, romantic or sexual attraction a person feels towards another person)	<u>Economic Factors: Employment Situation and Financial Resources</u> a) Employment situation (eg Employed, Unemployed, Retired) b) Financial Resources (eg Income, Savings, Personal Wealth, Inheritance) c) Effects of adequate financial resources d) Effects of Poverty
<u>Environmental Factors: Housing and Home Environment</u> a) Housing needs, conditions and locations (Type of home, Size, Rural and Urban) b) The home environment (Living with parental conflict, experience of abuse and neglect)	<u>Environmental Factors: Exposure to Pollution</u> a) Air Pollution (Causes and conditions) b) Noise Pollution (Effects on health) c) Light Pollution (Effects on health)

#### Impact of Life Events: Physical events and Relationship Changes

a) Physical events such as Illness, Puberty, Ageing and Accidents

b) Relationship changes such as:

- i) entering into a new relationship - can affect our self-esteem, affect our focus, affect our social activity
- ii) marriage - generally is a positive and happy event, can lead to sense of security/contentment, new opportunities
- iii) parenthood - can keep you physically and mentally active, love and affection, but a change in social activity, can also be a stressful and anxious time.
- iv) divorce - generally a negative event, although for some can be a positive relief. Enjoy being single again, making your own choices. Could cause a change in living standards due to less money, can be isolating and cause stress with family and friends, can cause low self-esteem.
- v) bereavement - causes us to grieve, can make our future uncertain, raise our levels of stress and anxiety, affect our physical and mental health, and cause isolation.

#### Impact of Life Events: Life Circumstances

a) Effects of events on our PIES - for example how imprisonment may affect a person's health and wellbeing due to being isolated from family and friends.

b) Different types of expected events - for example starting a new school, moving house, retirement

c) Different types of unexpected events - for example exclusion from education, unemployment (redundancy/being fired)

#### Health Indicators

- a) Health monitoring and illness prevention - can help detect any problems and then can be dealt with quickly to give the best chance of sorting them out.
- b) Measuring Health - measurable indicators such as blood pressure, weight, resting pulse rate
- c) Positive and negative aspect of lifestyle - can be trickier to measure, questionnaires are often used to collect information about lifestyle aspects such as amount of exercise someone does, do they have a balanced diet, do they use/misuse substances
- d) Observed indicators - helps health professionals gain information about the individual such as if they are flushed, sweating, breathless, limping etc

## STEP 2: CREATE CUES

**What:** Reduce your notes to just the essentials.

**What:** Immediately after class, discussion, or reading session.

**How:**

- Jot down key ideas, important words and phrases
- Create questions that might appear on an exam
- Reducing your notes to the most important ideas and concepts improves recall. Creating questions that may appear on an exam gets you thinking about how the information might be applied and improves your performance on the exam.

**Why:** Spend at least ten minutes every week reviewing all of your previous notes. Reflect on the material and ask yourself questions based on what you've recorded in the Cue area. Cover the note-taking area with a piece of paper. Can you answer them?

## STEP 1: RECORD YOUR NOTES

**What:** Record all keywords, ideas, important dates, people, places, diagrams and formulas from the lesson. Create a new page for each topic discussed.

**When:** During class lecture, discussion, or reading session.

**How:**

- Use bullet points, abbreviated phrases, and pictures
- Avoid full sentences and paragraphs
- Leave space between points to add more information later

**Why:** Important ideas must be recorded in a way that is meaningful to you.

## STEP 3: SUMMARISE & REVIEW

**What:** Summarise the main ideas from the lesson.

**What:** At the end of the class lecture, discussion, or reading session.

**How:** In complete sentences, write down the conclusions that can be made from the information in your notes.

**Why:** Summarising the information after it's learned improves long-term retention.
